

Copyright/Legal Issues Report

Cardspark - Group 26

June 5, 2016

The following libraries are being made use of by our Cardspark application:

- **Firebase** - Apache License V2.0 [1]
This is a free and open-source software license so it permits extensive modification and reuse of the Firebase libraries as long as we preserve the copyright notice and disclaimer.
- **Ruby on Rails** - MIT License [2]
The Rails source code is freely available on Github and is under the MIT license (free and open-source) so it permits reuse within proprietary software provided all copies of our code include a copy of the MIT License terms and the copyright notice.
- **JSQSystemSoundPlayer** - MIT License
Also available on Github and under the MIT License.
- **JSQMessagesViewController** - MIT License
Available from Github and again under the MIT License.

We must comply with the Data Protection Act 1988 [3] as we process personal data in the form of our users' email address which could be used to identify them. Therefore we should only process them when valid to do so under this act. Also to deploy our application to many iOS devices that are not in our possession would require the purchase of the Apple Developer License [4] and to accommodate the rules set by it.
