Design Ideas

Cardspark - Group 26

June 14, 2016

Im guessing this one is how we generated ideas about our app
Seems very similar to the first one
Talk about our research again and how we took inspiration from that
Also should talk about other app and how they inspired us

Eg We examined other popular apps and seen features that users liked and tried to see if they could be applied to our own app. This included the swipe feature that apps like Tinder have which is a very natural action and when we applied it to our flashcards, users who tried it enjoyed our app much more.
